

California OES

Daily Weather Threat Briefing

27 February 2017
10:00 AM PST

Day 1: Flooding continues along small streams and creeks and some main stem rivers.

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

Prepared by: Leslie Waite
801-524-7907

Key Hazards

Today

- A weather system is moving through far Southern CA today with periods of brief heavy rain and strong gusty winds near any thunderstorms that develop. At this time, rainfall rates are not expected to be high enough to warrant concern for debris flows over burn scars.

Tuesday-Saturday

- Dry weather. A few streams, creeks, and some mainstem rivers will continue running high. No new weather or water hazards expected at this time.

California OES Impact Threat Matrix

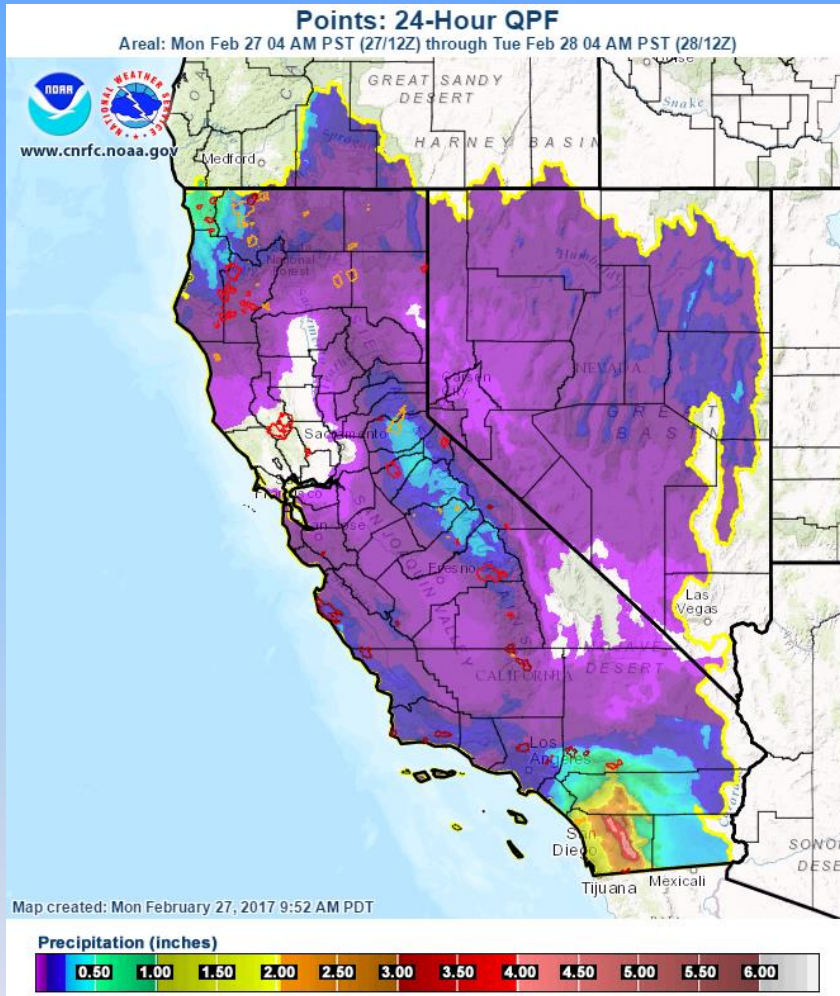

Feb 27, 2017 – Mar 5, 2017

Tuesday

Days 3-4 Precipitation Forecast

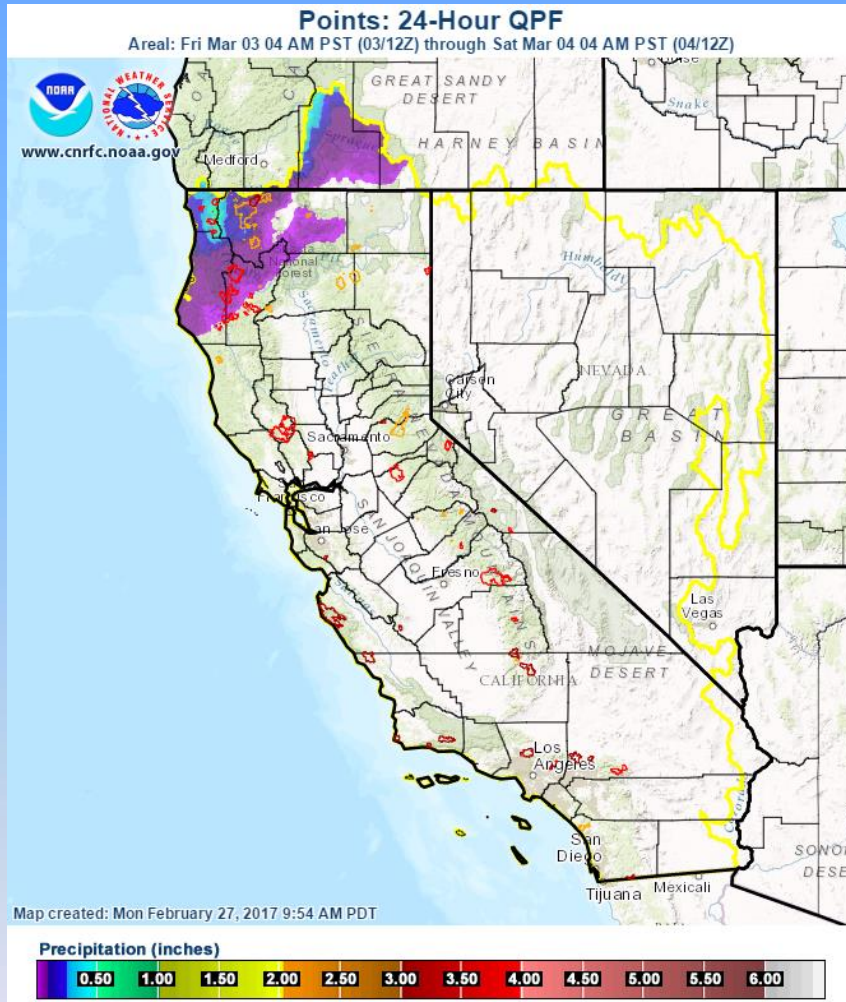

Wednesday

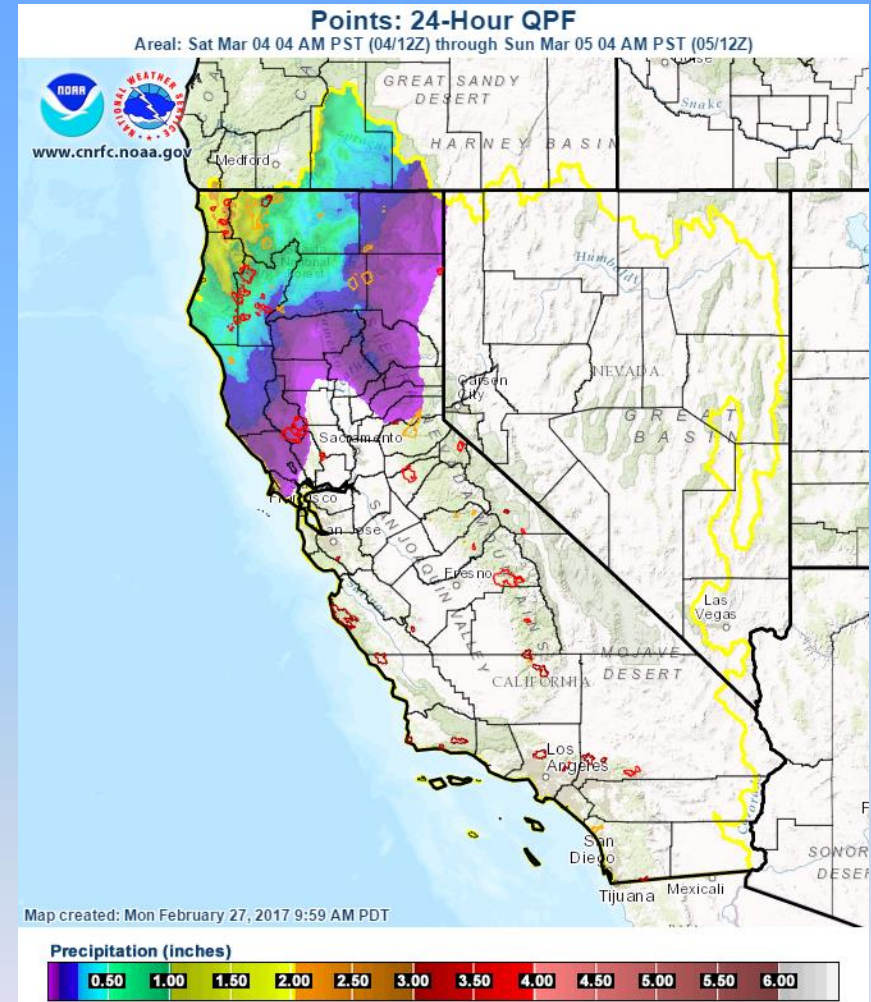

Thursday

Days 5-6 Precipitation Forecast

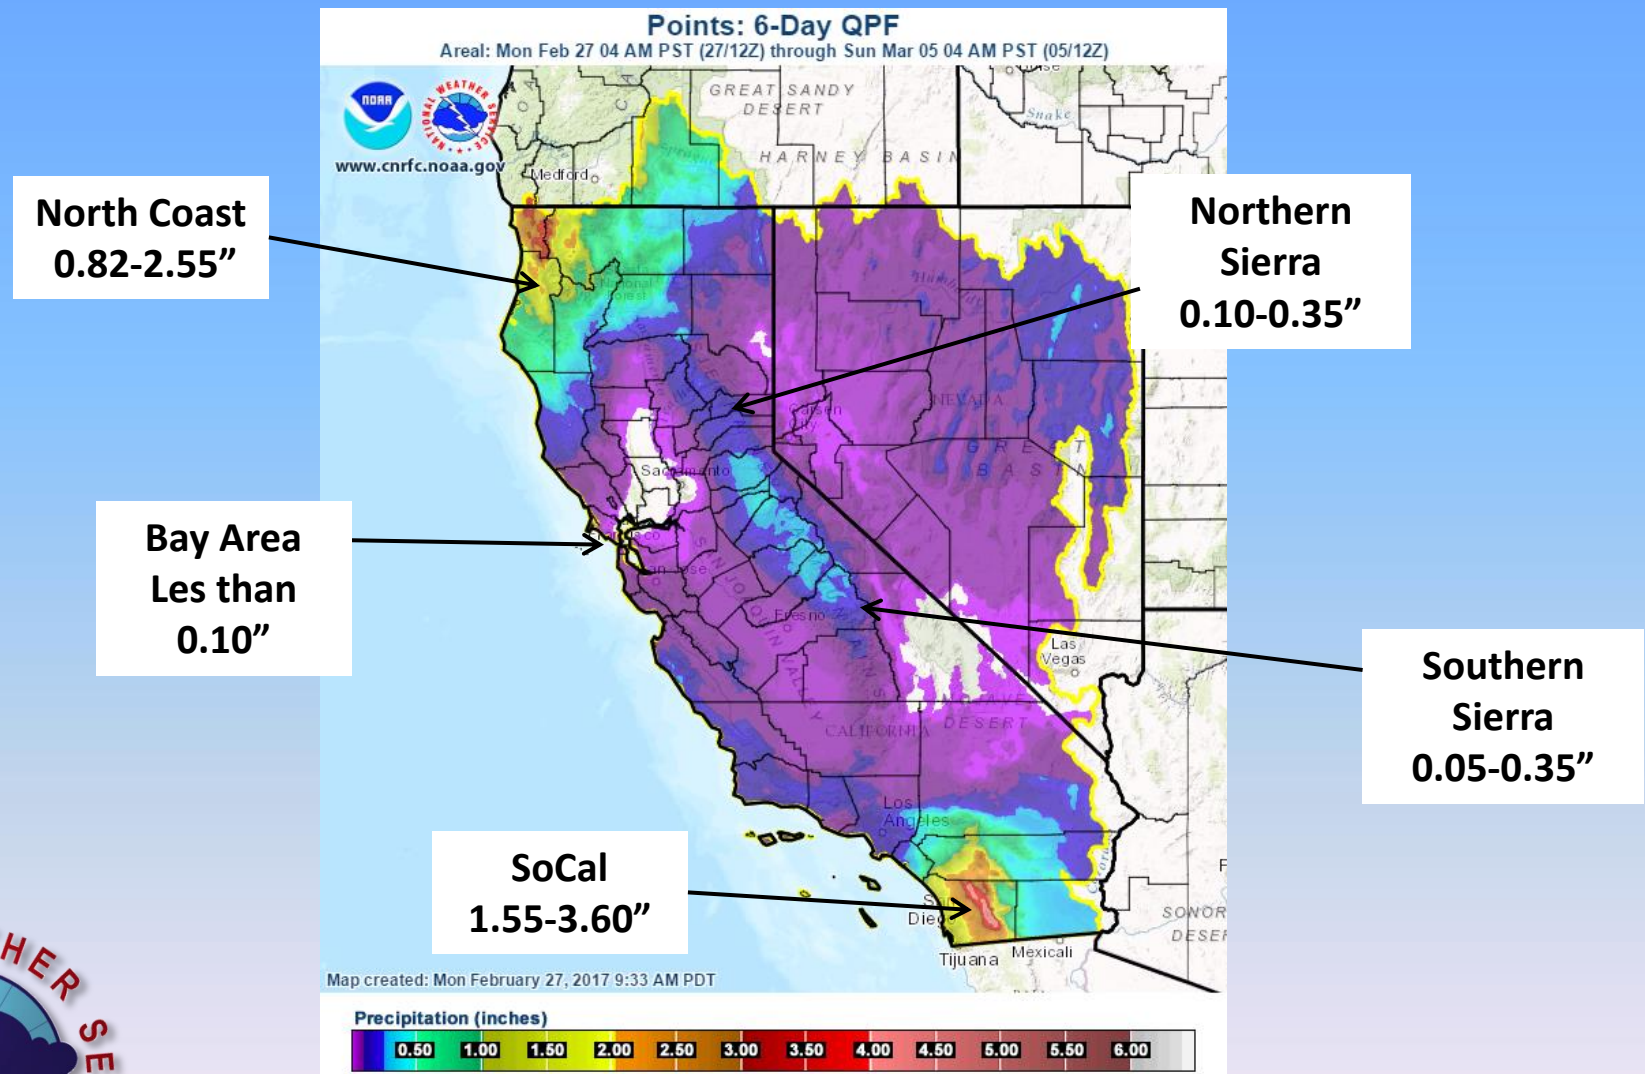

Friday

Saturday

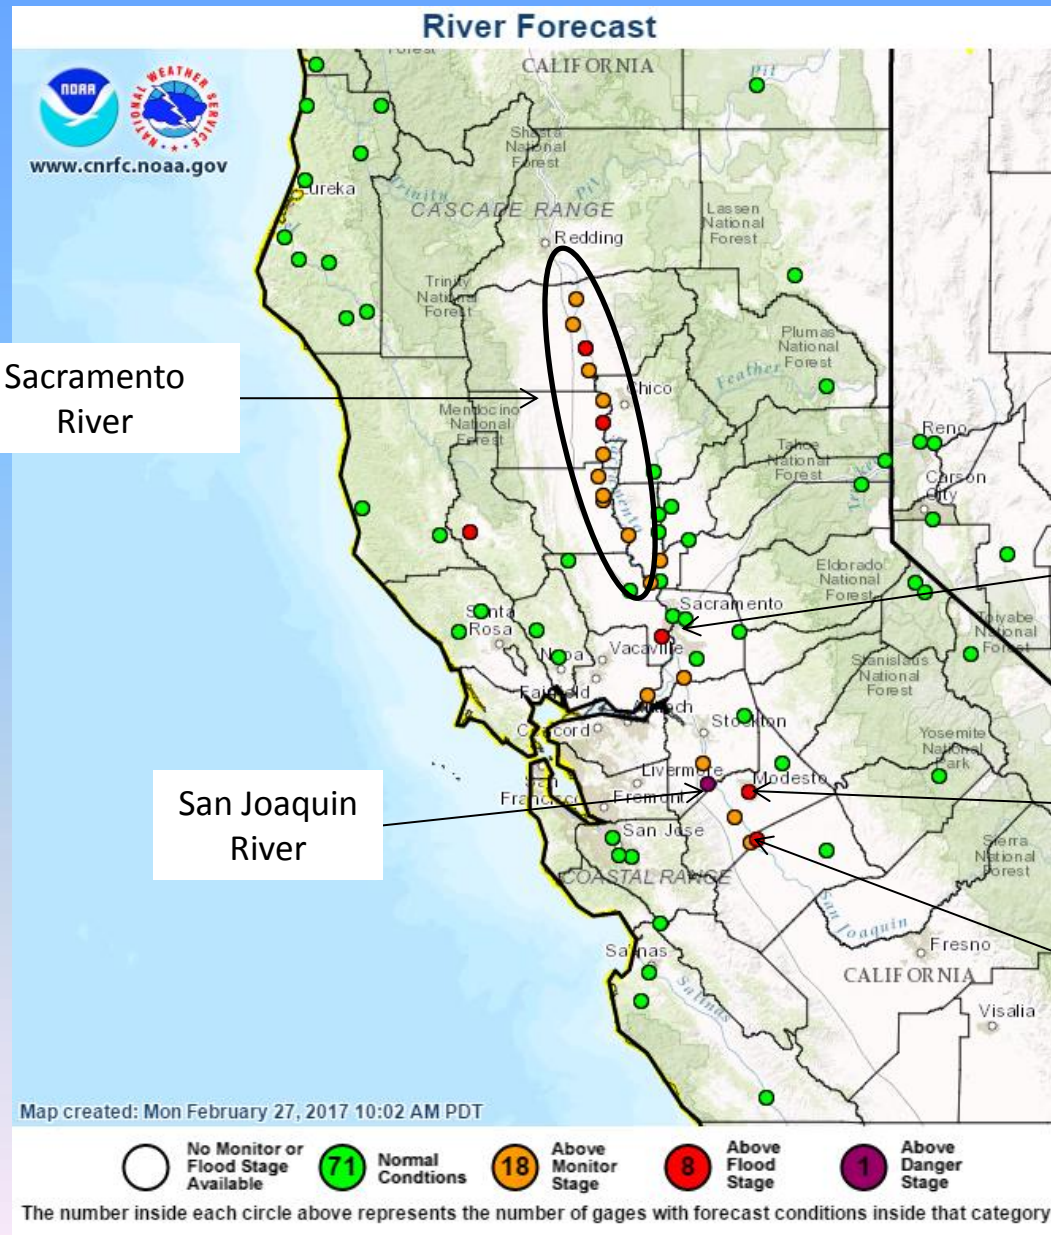

6 Day Precipitation Forecast

Valid Monday, February 27, 2017 – Sunday, March 5, 2017.

River Forecasts

River Forecasts

Sacramento River – Many points expected to remain in minor to moderate flood through the week. Varying impacts:

<http://water.weather.gov/ahps2/forecasts.php?wfo=sto>

Yolo Bypass – Forecast to continue at minor flood stage through the week. Impacts include Mound Farms, Kearney Ranch House and Senator Outing Duck Club flooding.

Tuolumne River – Modesto – Forecast to remain in flood stage until early Wednesday morning. Channel capacity is 55 feet.

Merced River – Forecast to remain above flood stage throughout the week. Impacts are not known. Please contact the Hanford Weather Forecast Office for more information.

San Joaquin River at Vernalis – Forecast to remain at Danger Stage until Friday morning. Impacts include severe seepage outside the levee. The area covered by seepage will increase as the river stage rises.
